SUMMARY

Full Stack Developer with strong frontend expertise, experienced in building & scaling web apps for SaaS and startups. Skilled at reducing latency, boosting UI performance, and shipping production-ready features fast. Hands-on with modern frontend frameworks, APIs, and cloud platforms. A never-give-up attitude, clean coding practices, and the ability to turn complex requirements into simple, effective solutions. Always learning, experimenting, and pushing to solve real world problems with clean and thoughtful code.

SKILLS

Frontend: Vue, React, TypeScript, JavaScript, HTML/CSS

Backend: Node.js, Express.js, Python (Flask, Django), PHP

Database: MySQL, PostgreSQL, MongoDB, Vector DB

DevOps: Docker, Kubernetes, AWS (S3, Amplify, EC2, RDS, Cognito, API Gateway), CI/CD, Git

Other: C language, R language, OWASP Zap, React Native, APIs, Linux, LangChain.js, n8n, MapBox

EXPERIENCE

Front-End Developer

May 2024 – Current

[GoDesta Saas](#) - Brisbane, Australia

- Optimised Microsoft Business Central API integration, which reduced average response latency by thirty percent and lowered error rates by forty percent based on internal monitoring.
- Migrated over two hundred Vue 2 components to Vue 3 with full compatibility. This unlocked faster delivery cycles and removed technical debt that slowed releases.
- Redesigned user flows and frontend architecture using Vue 3, TypeScript and SCSS. This improved initial load speed by twenty two percent and reduced customer friction across key workflows.
- Built an accessibility friendly theme system adopted by all four enterprise clients, which cut styling-related support requests by forty percent.
- Implemented real time multi tab sync using Pinia and Broadcast Channel. This lowered data inconsistencies by thirty five percent and improved user trust in shared session workflows.
- Delivered more than a hundred features end-to-end across Agile sprints, which helped reduce customer-reported UI issues by twenty per cent based on ticket counts.
- Supported a product used daily by about three hundred active users working eight hour shifts across four enterprise clients.

Software Developer Intern

Jul 2023 – Oct 2023

[Gilmour Space Technologies](#) - Gold Coast, Australia

- Developed dynamic Tree chart for visualization and simplification of complex data structures related to Satellite assembly. Enhanced user understanding and interaction with multi-level component hierarchies.

- Designed and implemented interactive tool using D3.js and Vue.js, enabling real-time analysis of complex hierarchical data for Satellite systems.
- Enhanced user experience and system performance, which decreased user-reported errors by 2%.

IT Support Technician

Apr 2022 – Aug 2022

Go Golfing Travel - Gold Coast, Australia

- Resolved 300+ IT Tickets, ensuring uninterrupted operations and optimal performance across systems and networks. Executed optimizations, boosted website speed by 50% and enhanced WordPress for better performance and SEO.

PROJECTS

Python - Data Analysis Desktop Application [[link-to-GitHub](#)]

Developed a desktop app using Anaconda and WxFormBuilder for Python, performing data analysis on New South Wales traffic data, resulting in actionable insights for traffic pattern improvements.

Portfolio AI Assistant [[link-to-GitHub](#)]

Built a reusable Vue component that adds a smart AI assistant to a personal site. The bot answers questions about skills, experience and projects using context-aware prompts.

FindMyLease Rental Management FullStack Web App [[link-to-GitHub](#)]

Built a React and Express Full-stack web app rental management system with secure user authentication, property listings, real-time Mapbox integrations and a PostgreSQL database.

D3.js Charts Playground [[link-to-GitHub](#)]

Built a visual org chart editor allowing users to explore trees, add nodes and persist data to an Express backend. Focused on smooth visual interactions and scalable data handling.

EDUCATION

Master of Information Technology in Software Development and Support

Dec 2024

[Griffith University](#), Gold Coast, Australia | GPA: 5.5/7

KEY SKILLS

Problem-Solving | Object-Oriented Programming | Continuous learning | Attention to detail | Adaptability
Collaboration & Teamwork | Spring & Agile Methodology | Project Management | Time Management
